Electric Library Lamps

For Christmas Gifts

YOU NEED ONLY TO SEE the beautiful collection we have just opened. You will at once recognize their charm and desirability for Christmas presents. The stands are in artistically fashioned brass and bronze, and the shades embrace solid color and mosaic glass in beautiful shapes and design.

Something New: The Edison Electric Lighting outfit for Christmas tree decoration. Consists of tiny electric lamps of many different colors which are to be festooned over the Christmas tree. Better and safer than candles. Simple and clean. Call and see them.

A HUNDRED TEACHERS MAY VISIT HAWAII

Big Excursion Planned From Southern California

That an excursion of about fifty or a hundred school teachers from Southern California is being planned is the latest bit of tourist news received by the Promotion Committee. It was contained in the following letter, which has already been answered by the Promotion Committee:

Dec. 4, 1937.

Hawaii Promotion Committee, Honolulu, T. H.

Gentlemen:—We are considering a proposition to bring to Honolulu this coming summer, a party of from fifty to one hundred teachers, to make about a three weeks' excursion through Hawaii. If you can give me any suggestions with regard to the route most desirable for this proposition, the length of time necessary and the size and quality of hotel or boarding house accommodations along the line, I should be much obliged. Our party being composed almost entirely of teachers, we would of course require rates from steamship companies, stage companies, hotel and boarding house keepers, etc., that are at the very lowest figure. Our plan is a personally conducted excursion guaranteeing, for a set sum per capita, all expenses paid. If you can get figures to show the total net cost per capita for this three weeks' trip or if you can suggest a source from which we can get such information complete, it would aid us very much where forming our party as we can not make any price to prospective excursionists until we can know the entire cost of the proposition. Our party will consist of not less than twenty-five, nor more than one hundred. If figures can be gotten for this maximum and this minimum number, the basis would be safe to figure upon.

Thanking you in advance for the favor requested, I am

Yours very truly,

E. J. ARMSTRONG.

Gillett Says Investigate

CLAIMS TRUST COMPANY HAS NO
EXCUSE FOR CROOKED
WORK

Concerning the decision to apply for a receivership for the California Safe Deposit and Trust Co., Governor Gillett made this statement:

"The conditions warrant the Grand Jury in closely investigating the methods of doing business that have been in vogue with the officials of the institution.

"Of assets amounting to \$9,000,000 hardly more than \$2,000,000 are available. On the day the company closed its doors it had only \$404,000 on hand, a trifle over four per cent. whereas the law requires that at least twenty per cent. be held in reserve. To the directors and to companies controlled by the directors \$3,253,119 was loaned. The securities given in these cases were of little value and many of these loans were entirely unsecured.

"Besides the immense sum lent to directors and to companies under their control amounts from one thousand to thirty-five thousand dollars were sent to people having no standing in the community and with security that was practically worthless. It seems that the officials of the institution didn't pay any regard to the rights of the depositors in the way in which they lent money without security and to themselves with questionable security. The manner in which they conducted a banking business clearly proves the necessity of stringent banking laws which will adequately protect depositors. The Bank Commissioners could do nothing else than order the Attorney General to commence proceedings to have the bank declared insolvent and placed in the hands of a Receiver. There is no excuse at all for the banking business done by the officials of the insolvent trust company."

Seattle, Wash., Dec. 9.—According to advice received on the steamship Empress of Japan, the naval program of the Japanese Admiralty will entirely eliminate cruisers, coast defense ships, dispatch boats and gunboats, which in view of past experiences they consider useless. A prominent Japanese naval official says that future building will be confined to battle-ships, armored cruisers, destroyers and torpedo-boats. The new battleships will be of 29,000 tons and the armored cruisers not greatly inferior in armament and displacement. The duties of small cruisers will hereafter be done by destroyers.

PINKHAM AND THE TOWEL

Under the heading "Pinkham and the Towel," the Hilo Tribune publishes the following as its leading editorial in the issue of December 17:

It must be entirely satisfactory to President Pinkham of the Territorial Board of Health to read the attacks which are made on him day by day in that dirty towel which calls itself the Advertiser. That such an offensive sheet should be permitted to exist is the fault of Honolulu alone. Here in Hilo we have our troubles. We have a very bad Board of Supervisors. We have a number of other ills of which we are not proud.

But—
Thank goodness we have not the Advertiser!

With every favor in the hand of that absurd sheet, it remains an absurdity. Right and left that sycophantic journal, handled as it is by competent incompetency, does the worst sort of work that this whole Territory of Hawaii could ever wish to avoid.

The attacks on President Pinkham are among the worse of the Advertiser's many sins. The genesis of them is not hard to find. It is true, for it originates in the opposition to a street railway which Pinkham planned to build. This will probably be denied but it is hardly likely. If the whole Advertiser outfit, including the alleged editor and his staff, had as much brains in a whole year as Pinkham has in ten minutes, this Territory of Hawaii would have cause to arrange with the Governor for the general singing of a "Te Deum."
